## SUMMARY

Passionate Full Stack Web Developer aspirant with a love for crafting seamless and dynamic digital experiences. To make strong foundation in both front-end and back-end development, I thrive on bringing creative visions to life through code. I'm dedicated to pushing the boundaries of what's possible on the web, and I'm always in search of new challenges and opportunities to create innovative solutions.

---

## PROJECTS

### Library Management System

Rayalaseema University • <https://github.com/bhasidhshaik/library-management-ru> • October 2023 - December 2023

- Developed a comprehensive library management system application using Node.js and MongoDB.
- University students use login credentials to access personalized features in the library application, enabling them to borrow books, access digital resources, and manage their library-related activities efficiently.
- Revamped user interfaces to enhance accessibility and streamline navigation, ensuring a seamless experience for university students accessing educational resources through the library application.

### College Website

Rayalaseema University College of Engineering • <http://ruce.ac.in/> • August 2023 - October 2023

- Developed a modern, user-friendly college website with intuitive navigation.
- Integrated dynamic features for seamless communication and information sharing.
- Implemented interactive elements to showcase events, announcements, and important resources.

---
